🎯 Target Role: Senior Full Stack Developer

PROFESSIONAL SUMMARY

Experienced Senior Full Stack Developer with a strong background in developing and maintaining scalable applications. Proficient in API design and optimization, I excel in collaborating with cross-functional teams to drive architectural decisions and enhance application reliability through continuous monitoring and improvement.

TECHNICAL SKILLS

Full Stack Development | API Design & Optimization | Scalable Application Development | Collaboration with Technical Leads | Continuous Improvement | Application Monitoring & Optimization | Python | Node.js | FastAPI | Django | Flask | JavaScript/TypeScript | Docker | RabbitMQ | Celery | Kafka | Apache Airflow | MySQL | PostgreSQL | AWS | Twilio | Google APIs

PROFESSIONAL EXPERIENCE

Back End Developer at FORWARD Platform

May 2022 - Present (4 years 6 months)

Developed and maintained scalable full-stack applications, optimizing APIs and services using FastAPI and Node.js. Collaborated with Technical Leads and Product Owners to design architecture and implement CI/CD processes. Enhanced application reliability through monitoring and optimization, successfully automating key business processes and reducing manual work by 1 hour per day.

Full Stack Engineer at FORWARD Platform

May 2022 - Present (4 years 6 months)

Designed and built a payment ecosystem integrating PayPal and other banking services. Centralized communication by creating APIs for SMS and email notifications. Contributed to architectural decisions and improved operational efficiency, freeing up 20 hours per month for strategic operations.

Back End Developer at ComprandooEnGrupo.net

January 2021 - May 2022 (1 year 5 months)

Developed and maintained microservices and APIs using Python and JavaScript, enhancing integration between internal systems and customer acquisition platforms. Managed AWS infrastructure to ensure application reliability and scalability, implementing CI/CD for continuous improvement.

Back End Developer at JPMorgan Chase & Co.

June 2019 - January 2021 (1 year 8 months)

Led the design and implementation of a portfolio optimization system, achieving a 20% reduction in operational costs. Collaborated with cross-functional teams to ensure compliance and reliability, integrating multiple APIs for banking operations management and enhancing application performance.

Back End Developer at Grupo MSA S.A.
May 2017 - June 2019 (2 years 2 months)

Created web applications for managing election systems, contributing to architectural decisions and enhancing user interfaces. Maintained and optimized voting machine software, ensuring reliable communication of voting information.

EDUCATION

Universidad Nracional de La Matanza
4to Año - Ingenieria en informática · (2015 - 2018) |
